Hoje é possível fazer algo muito mais poderoso.

Por exemplo para cada usuário que entrar na nova Power podemos ativar -

- GMAIL - Enviaremos email usando a conta do usuário
- Dropbox - Usaremos para compartilhar vídeos, fotos e imagens para os usuários.
- Google App Engine - Usaremos para realizar processamento de parte da navegação do usuário

Sem contar outras soluções como o Evernote, Git/Mercurial, Amazon WebServices.

O legal que utilizaremos a cota free desses serviços para trazer valor para Power e usuário.

Atc,

Eric

Uma tal de empresa chamada Power já fazia isso, e muito mais... :P

De qualquer forma me cadastrei no site para a Beta version.

Today it is possible to make something much more powerful.

For example, for each user entering the new Power we can activate –

- GMAIL – We will send email using the user's account
- Dropbox – We will use this to share videos, photos and images for the users.
- Google App Engine – We will use this to perform processing of part of the user's navigation

That's without counting other solutions such as Evernote, Git/Mercurial, Amazon WebServices.

The great thing is that we will use the free cost of those services to bring value to Power and the user.

Regards,

Eric

Some company called Power was already doing that, and much more... :P

Anyway, I registered at the site for the Beta version.
